DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 35 and 36, drawn to switching traffic in a network, classified in class 370, subclass 389.
- II. Claims 14-20, 28-34, and 37, drawn to bridging a call between an packet switch network (IP network) and a circuit switch network (PSTN) , classified in class 370, subclass 356.
- III. Claims 21-30, drawn to call signaling over VOIP, classified in class 370, subclass 410.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions I, II and III have different modes of operations.

Because these inventions I, II, III are distinct for the reasons given above and have acquired a separate status in the art because of their different subject matter, therefore, restriction for examination purposes as indicated is proper.
